

GlobalBlock MasterInvestor

Digital Asset Broker to the UK

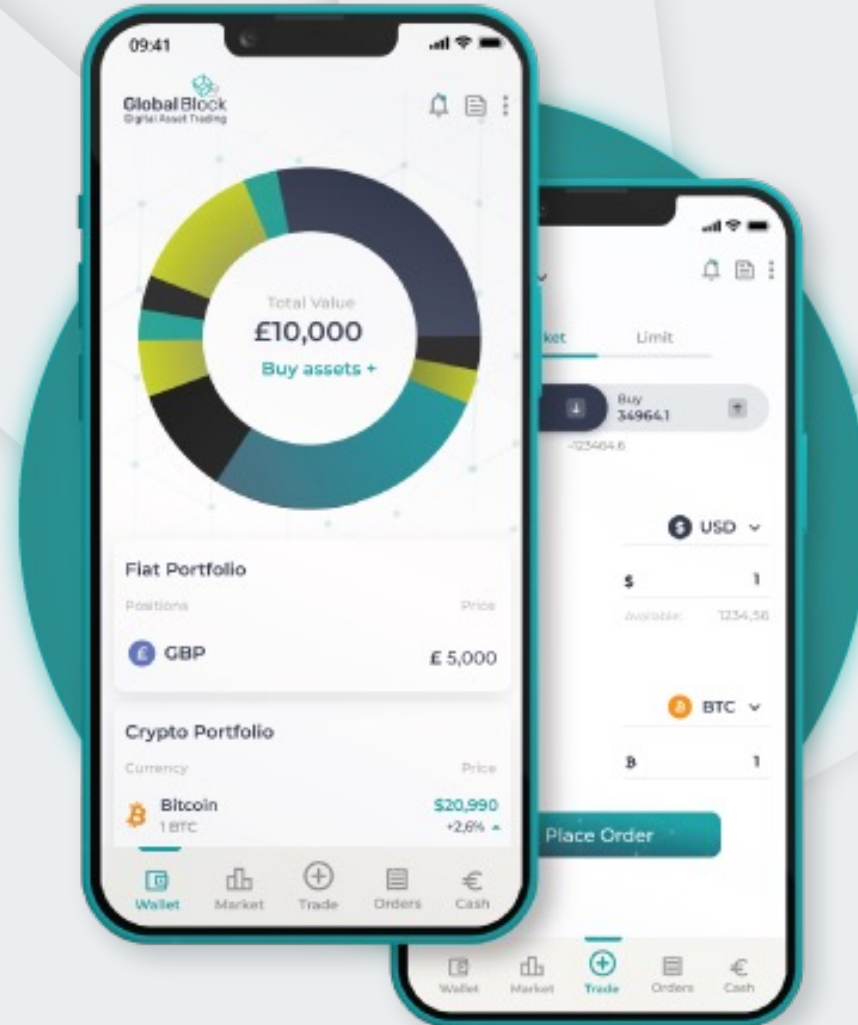

GlobalBlock
Digital Asset Trading

Who we are

Cryptocurrency Broker: Operationally based in the UK.

- Service Led
- Transparent
- Secure

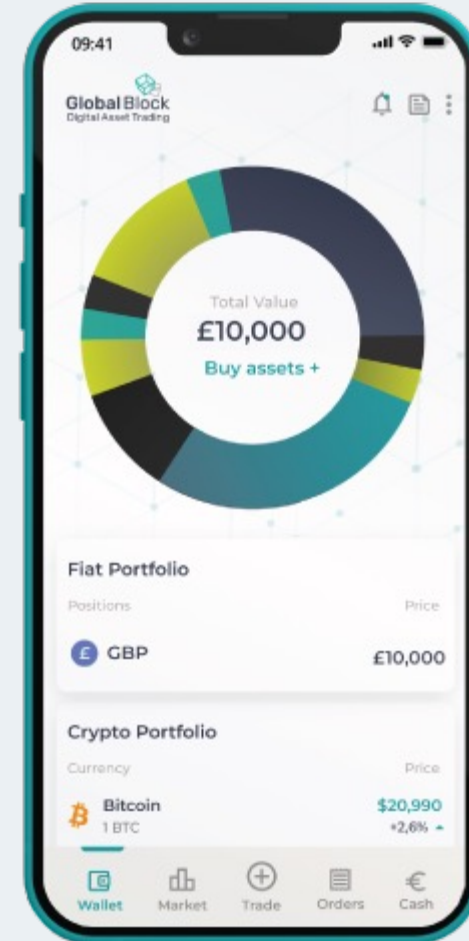

Service Led

We provide an unmatched one-to-one service to all our clients.

You are allocated a personal account manager right at the start of your journey.

They will guide you through the entire process so you can trade crypto with confidence.

We are here to provide you with the technology that you need but wrapped up in the personalized service you want.

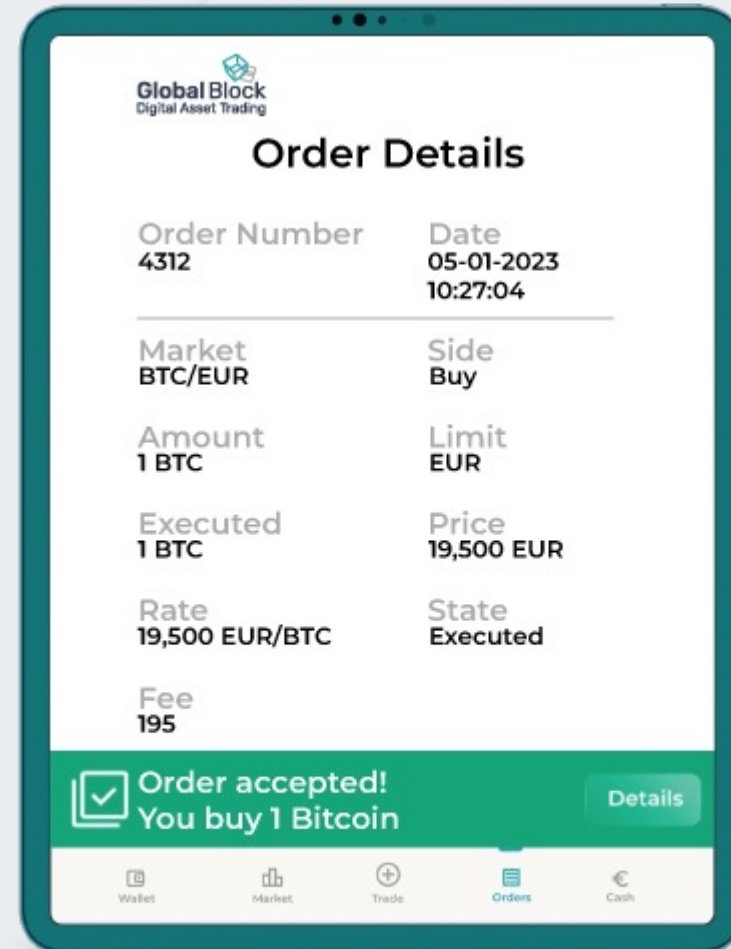

Transparent

We believe in price transparency and don't hide our charges.

We make it clear what you pay before we execute a trade.

No funding fees, no withdrawal fees.

As a cryptocurrency broker, we take pride in offering some of the best available prices on the market over a wide range of digital assets.

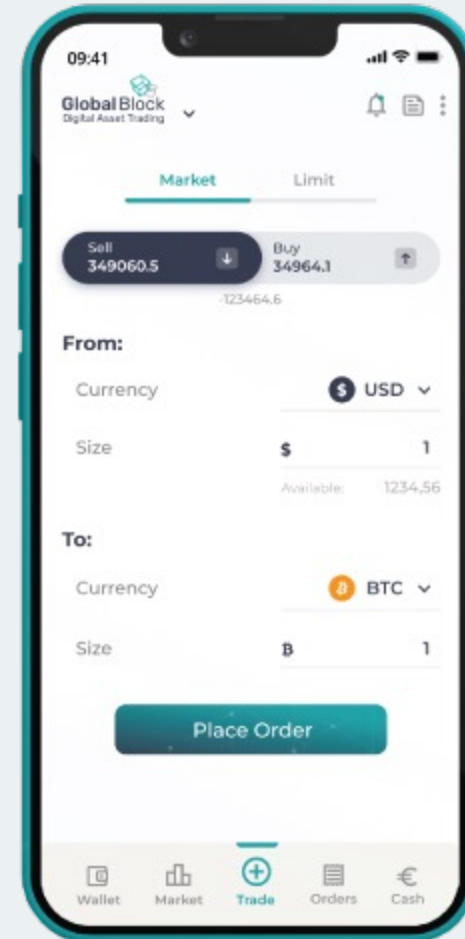

Secure

We take security seriously and have partnered with industry leader Qredo to provide a Layer 2 digital asset tracking and settlement infrastructure.

This infrastructure removes the security risks of dealing in digital assets and enables real-time crypto-asset transfer.

The vast majority of digital assets stored with us are insured against theft and criminal intent.

Wide Range of Markets and Expertise

We offer much more than just Bitcoin and Ethereum.

You can buy and sell a broad range of crypto pairs and markets easily on our app, or through our OTC service using secure messaging and telephone-based execution processes.

Our clients trade in over 100 cryptocurrencies with us, providing you with a diverse range of options.

We offer corporate assistance for many different sectors, including some of the Top UK legal and accountancy practices, who are looking to lean on an expert partner when it comes to Digital Assets.

We cover areas such as probate and divorce and assist with crypto-based escrow inquiries.

Our retail App was launched last year.

We are currently in the process of releasing a suite of new products and increased functionalities, the first to be released is the GB10.

What is the GB10

A Diversified Smart Investment Portfolio

The GB10 is a diversified investment portfolio that provides instant exposure to the top 10 cryptocurrencies weighted by market cap.

We have designed GB10 to give investors an easy way to manage their portfolio, so it is automatically rebalanced each month, reducing the risk and volatility of holding individual coins.

To further help our investors we added a direct debit style approach so you can leave the hard part up to us and enjoy the instant, smart investment.

How GB10 Works

Traditional finance tells us not to have all our eggs in one basket

a well-diversified portfolio best bet for consistent long-term growth.

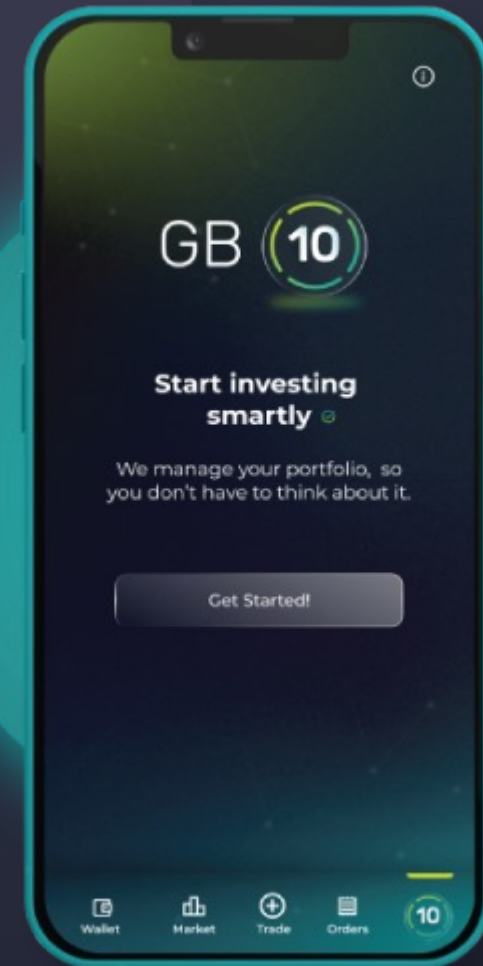

the GB10, we have applied this theory to crypto
easy for investors to buy a smart portfolio

Just the biggest coins, weighted by market cap.

automatically spread across these coins,

reducing some of the risk and volatility

Admin & stress-free instant investment.

Added Benefits of GB10 for Investors

DCA Investment Strategy

Automated equal investments at regular intervals.

With the DCA technique, you benefit from the market by going down and buying at lower prices.

Therefore, benefit from the volatility

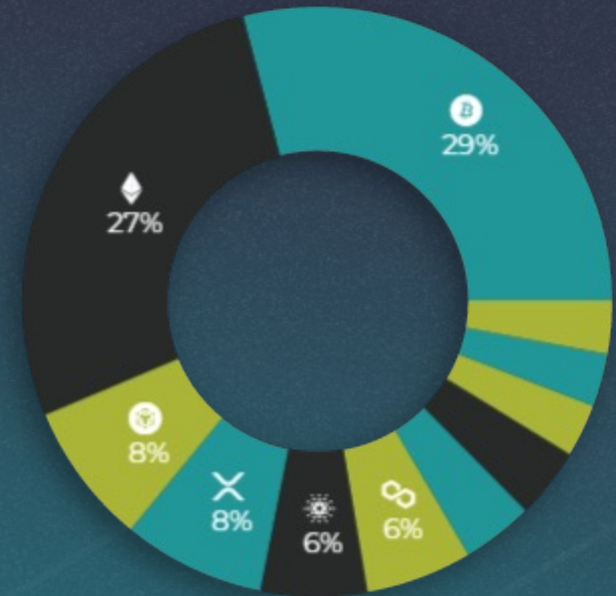

Eliminate short term noise

Eliminate hard decision-making of what to buy, when and how much!

How to get started

- Download our app or visit the GB10 online portal.
- Register using a valid Email, SSO or Metamask.
- Verify your identity by following the simple steps.
- Deposit funds into your account securely, quickly and easily.
- Apply the automatic monthly investment.
- Enjoy the smart investment!

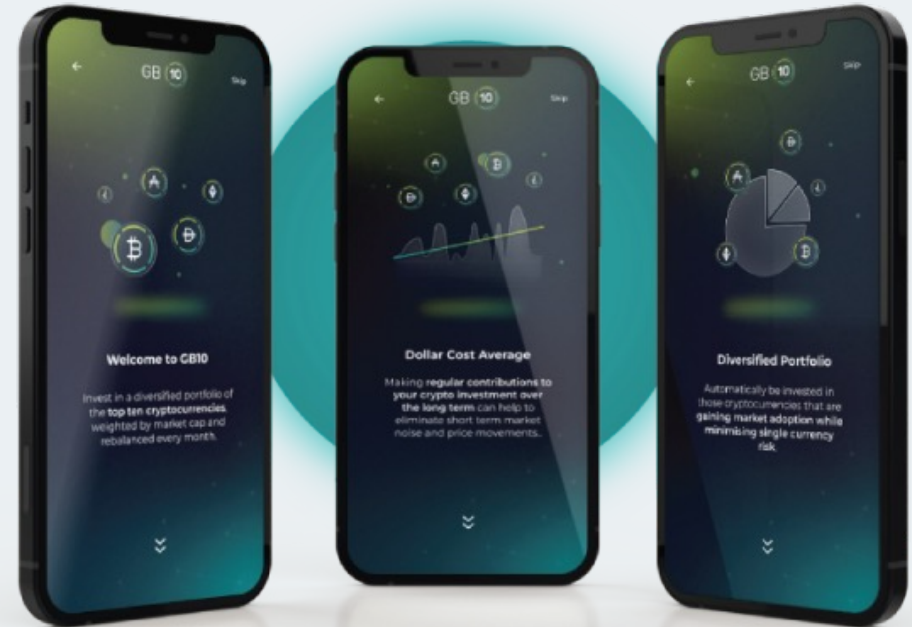

Key Features of GB10

Balance: Investing in the top 10 cryptocurrencies can also provide investors with a more balanced portfolio.

Diversification: Rather than putting all of their money into one currency, investors can spread their investments across multiple cryptocurrencies

Dollar Cost Average: By making regular contributions to your investment, you can benefit from DCA's advantages and eliminate the hard part of deciding when to buy.

Rebalanced: Automatically rebalance of your portfolio, gaining exposure to the cryptocurrencies gaining biggest market value while minimizing single-currency risk.

Why choose GB10?

Exposure to the best cryptocurrencies.

~60% of the market cap of all of crypto.

Allows new and experienced investors to get exposure to a large share of value in the market.

Many of the top 10 cryptocurrencies have been around for several years and have proven their stability and security over time.

A diverse range of Blockchain technology sectors and use cases.

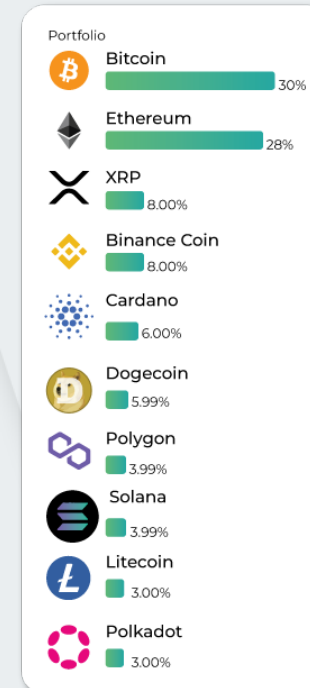

DCA direct debit style approach for either an accumulation over time or simply just deposit and forget about it.

An excellent option for people looking to get involved in the crypto space, but don't want the headache of managing their own portfolio.

A starting point for new investors.

Easy to compare results over time.

Can reduce the risk of a major loss, as the performance of one currency may not affect the performance of the others.

Market Evolution

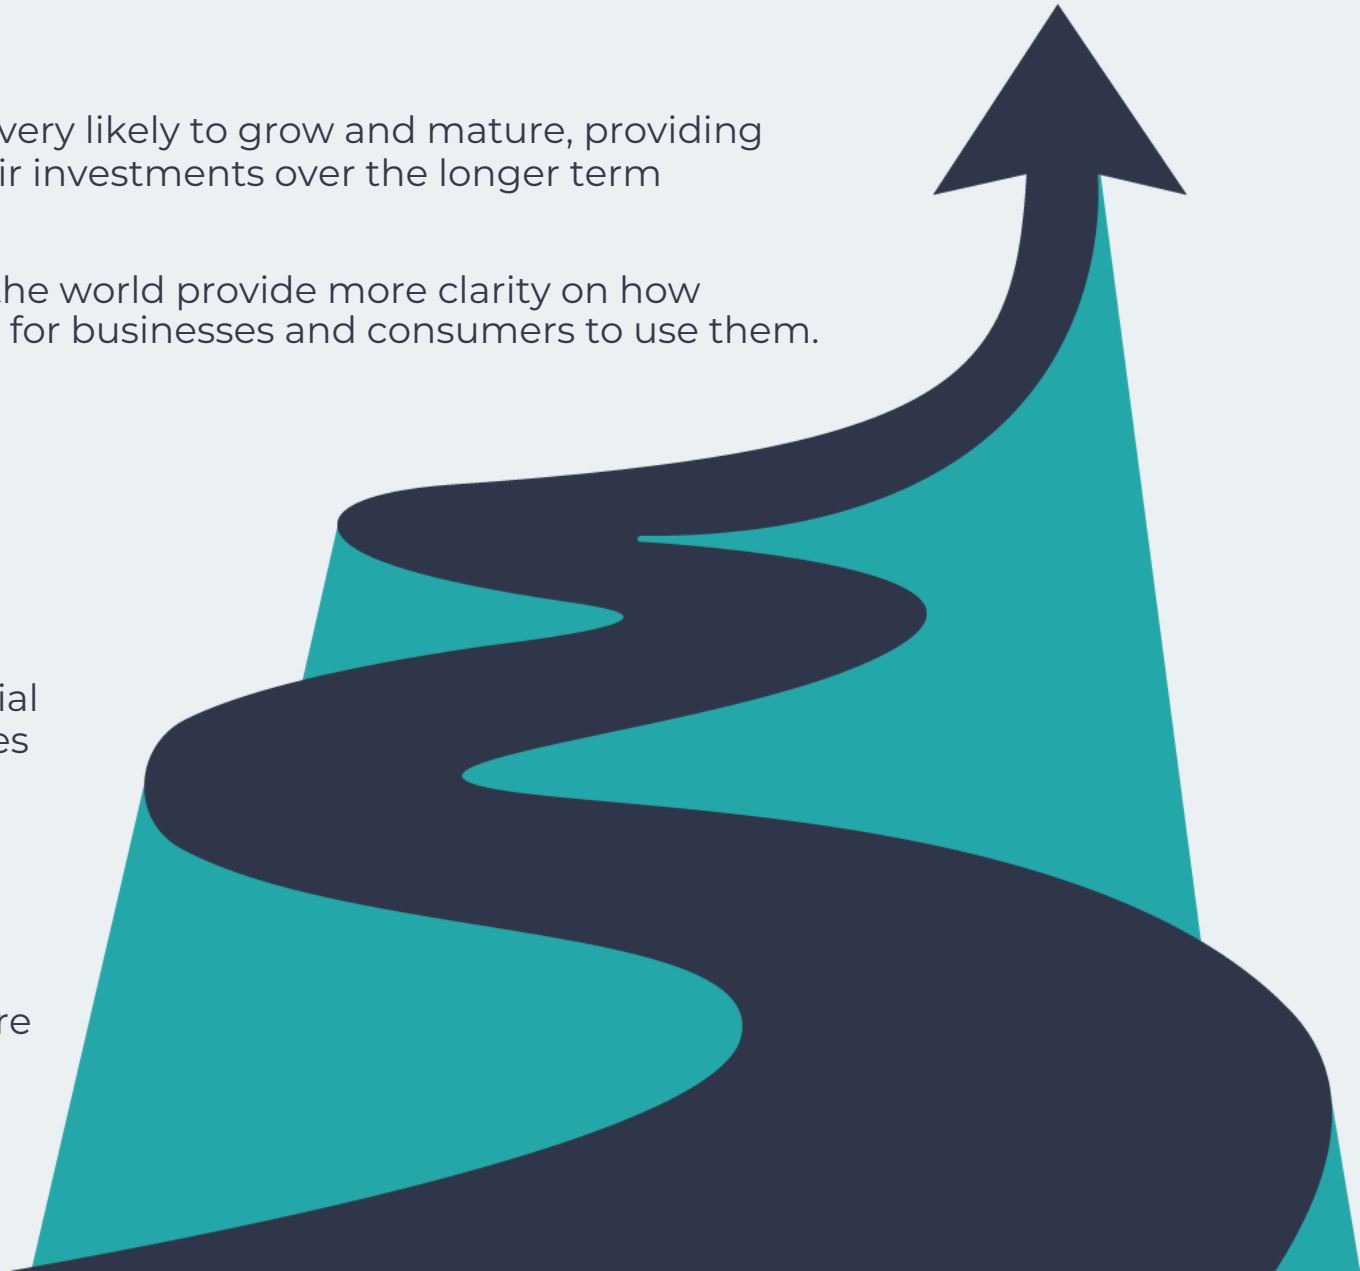

Growth of the crypto market: The crypto market is very likely to grow and mature, providing investors with the potential for significant returns on their investments over the longer term

Increased regulatory clarity: As regulators around the world provide more clarity on how cryptocurrencies should be treated, it will become easier for businesses and consumers to use them.

Rapidly increasing inflation: inflation rates are a problem, particularly outside western nations making cryptocurrencies an attractive alternative to traditional currencies.

New Payments players: Twitter and other major social media platforms are exploring the use of cryptocurrencies for payments, which will parabolically increase adoption among their users.

Easier access for institutional players: As more institutional investors enter the crypto market, it will become more mainstream and widely adopted with more structured regulated products in the pipeline.

Market Evolution...

Greater consumer protections: As more regulations are put in place to protect consumers, more people will feel comfortable using cryptocurrencies.

Easier access to Fiat on/off ramps: As more players in the space have spent time building easy ways to convert between cryptocurrencies and traditional fiat currencies, it will become more convenient to use cryptocurrencies for everyday transactions. GlobalBlock can do this in seconds.

Faster adoption: With automated onboarding processes, it will become easier for new users to get started with cryptocurrencies.

AML/KYC becoming more ubiquitous: Anti-money laundering and know-your-customer regulations are becoming more widespread, making it easier for businesses to comply and reducing the risk of fraud.

Major players in the space: With the involvement of companies like Mastercard, Visa, and Amazon, cryptocurrencies are becoming more widely accepted and recognized.

Web3: With the growth of Web3 technologies, such as blockchain-based decentralized applications, the potential uses for cryptocurrencies will continue to expand.

Thank You

Recap

GlobalBlock is a leading cryptocurrency broker, providing secure and regulated services to investors.
